Carlos Diogo

Software Engineer

Porto, Portugal | carlos.f.diogo@gmail.com | github.com/carfsfmd | linkedin.com/in/carlos-diogo-92b060269

Education

Faculty of Engineering, University of Porto (FEUP) Sep 2024 – Jun 2027
B.S. in Informatics and Computing Engineering *Porto, Portugal*

Colégio de Gaia Sep 2021 – Jun 2024
High School Diploma | Informática e Tecnologias Multimédia *Vila Nova de Gaia*

- GPA: 19.7/20

Experience

Academic Tutor Oct 2025 – Jul 2026
Faculty of Engineering, University of Porto *Porto, Portugal*

- Created clear learning materials and support resources for Calculus I and II

Power Platform Software Developer Intern Dec 2023 – May 2024
APR - Technology Solutions *Ermesinde, Porto, Portugal (Remote)*

- Built a Microsoft Power Apps solution that simplified how users record, organise and monitor expenses
- Improved the user experience and streamlined financial workflows through practical low-code development

Power Platform Software Developer Intern Jun 2023 – Nov 2023
bwd Digital Transformation *Porto, Portugal (Hybrid)*

- Helped develop a Microsoft Power Apps solution for an international company, improving business workflows and operational efficiency
- Designed automated processes with Microsoft Power Automate to reduce manual work and improve process consistency

Projects

Ark (github.com/rodrgds/ark · CodeSpring Hackathon, ISEP · 3rd place) May 2026

- Built an offline-first survival companion for iOS and Android: offline maps, a searchable knowledge library, encrypted notes and backups, and an on-device AI assistant that searches the user's own sources
- Added field tools (compass, barometer, GPX recording) with Expo, React Native, SQLite full-text search and native modules for routing, OCR and ZIM reading

ARC Gym (3-person team · Web Languages and Technologies) Mar 2026 – Jun 2026

- Co-developed a gym management platform with strict PHP, SQLite, semantic HTML, layered CSS and vanilla JavaScript/AJAX, without application or CSS frameworks
- Implemented class registration and waitlists, trainer/member/admin workflows, equipment reservations, memberships and analytics; added QR check-in, a Bearer-authenticated JSON/XML REST API, audit logs, backups and security hardening

INFOCUIDA (Software Engineering course, FEUP) Feb 2026 – Jun 2026

- Built a mobile platform giving informal caregivers learning resources, moderated peer-support forums, and professional profiles with job listings and applications
- Supported accessibility with guided onboarding and customisable settings; built with Flutter, Dart and Firebase (Auth, Firestore, Storage, Cloud Messaging)

FisioFinder (Professional Aptitude Project, Colégio de Gaia) Nov 2023 – Jun 2024

- Created a physical medicine and rehabilitation platform with a mobile app, website and admin portal: appointment scheduling, medication reminders, a caregiver view and an interactive clinic map
- Added voice-based forms and text-to-speech; built with Flutter, Dart, Supabase, PostgreSQL, PHP and the Google Maps API

Honors & Awards

- **1st place**, CodeSpring Hackathon 2024 (ISEP) — NatuReal, bird-watching web application (hackathon project)
- **3rd place**, CodeSpring Hackathon 2026 (ISEP) — Ark, offline-first survival companion
- High School Diploma, Informática e Tecnologias Multimédia, Colégio de Gaia — GPA: 19.7/20

Skills

- **Languages:** Dart, TypeScript, JavaScript, C/C++, Java, PHP, SQL
- **Frameworks & Tools:** Flutter, React Native, Expo, Tailwind CSS, DaisyUI, jQuery, Microsoft Power Apps, Power Automate, Gradle, JUnit
- **Infrastructure:** Firebase, Supabase, PostgreSQL, MySQL/MariaDB, SQLite
